

LIVE WORKING SYSTEM

A horizontal line representing the Ner Corridor route. It starts at a green circle labeled "GUWAHATI DEPOT" on the left, passes through a green circle labeled "NER CORRIDOR" in the middle, and ends at a green circle labeled "SHILLONG DEPOT" on the right. Below the line, text reads: "≈ 98.8 km of real OSRM road · plain to plateau · the live demo corridor".

PROBLEM STATEMENT ID

MDoNER · Smart Automation · Software

AI-Based Smart Logistics and Accessibility Intelligence Platform for North Eastern Region (NER)

Smart Automation

Software

17 (internal group no.)

NER-AI LOGISTICS

“Can this essential-supply truck reliably use this corridor now?”

End-to-end working prototype · physical-phone validated · live demo corridor Guwahati → Shillong

Manager route review · Driver navigation — real screens

PROPOSED SOLUTION

Not the shortest road. **The road that is usable now.**

Monsoon · landslides · floods · official warnings · single-lane hill roads · no signal. **A shortest-path router still sends the truck.**

A NORMAL ROUTER

RASTA AI · THE SAME ROAD, DECIDED ON EVIDENCE

UNKNOWN ≠ SAFE

Missing or stale evidence is marked UNKNOWN — never safe — and goes to an authorised reviewer.

MANAGER · CHECK CONDITIONS

REQUIRES REVIEW

Hazard evidence is incomplete or elevated. An authorised reviewer must review this route before selection. Refresh conditions after review.

Landslide data is not available - no source is connected. · Steep gradients on this route · Landslides have been recorded along this route in the past. · The landslide inventory ends in 2017 - recent years are not covered. · River levels near this route are close to their recent average. · No official disaster alert names a district on this route right now. · No fleet truck has driven this road in the last fifteen minutes, so traffic is unknown.

Unavailable: Fuel range, Landslide, Road quality, Truck restrictions

Evidence coverage · Weather AVAILABLE · Terrain AVAILABLE · Warnings AVAILABLE · Traffic UNKNOWN

TERRAIN

0.5 KM STEEP

49-1436 m · 1975 m climb · steepest 10.3%
flat 61.8 km · rolling 29.6 km · hilly 7.0 km · steep 0.5 km
Copernicus DEM GLO-90 via Open-Meteo + SRTM 30 m via OpenTopoData · 100% of 198 samples answered

LANDSLIDE HISTORY

HIGH EXPOSURE

22 recorded landslides within 5 km of the road, nearest 0.4 km
6 more nearby placed too imprecisely to count · HIGH is three or more; MODERATE is one or two
NASA Global Landslide Catalog · inventory 2007-2017 — aged, recent years not covered

RIVER LEVELS

NORMAL

Discharge at 5 river cells along the corridor, highest 1.0x its own 30-day mean · GloFAS via Open-Meteo, 2026-09-14. A level, not a flood forecast and not a road-closure claim.

OFFICIAL ALERTS

NONE ON CORRIDOR

NDMA SACHET CAP feed, 99 alerts nationwide at 10:13:54 PM · placed by district name (Dispur, East Khasi Hills, Kamrup Metropolitan, Myllem, Ri-Bhoi, Umling, Umsning) · 4 more active elsewhere in the corridor states, not placeable on this road.

FLEET TRAFFIC

UNKNOWN

Not a concept. A working end-to-end prototype.

REAL SCREENS FROM THE CERTIFIED RUN

Manager • route review

Driver • truck check

Driver • navigation

PROOF

Run end to end on a physical Android phone, hosted backend, real road.

12/12 physical judge-flow steps

9/9 physical role-flow steps

1138+ backend • 621+ driver • 170+ manager tests

PHYSICAL ANDROID • CERTIFIED

Canonical demo Guwahati → Shillong • ≈ 98.8 km real route

KNOWN LIMITS → MITIGATION Cold start → warm /health first • rate limits → cached evidence + explicit UNKNOWN • push needs Firebase → in-app alerts work • experimental ML → outside routing

IMPACT AND BENEFITS

RASTA AI does not ask only “Which road is shortest?” It asks “**Can this truck reliably use this corridor now?**”

FOOD • MEDICINE • FUEL • RELIEF SUPPLIES — essential logistics for hill communities, decided on evidence

DEMONSTRATED TODAY

- | | |
|--|---|
| 23 selectable languages, explicit fallback status | 12/12 judge-flow steps certified on a physical phone |
| 11 route factors in every decision | 100 % of reroutes reviewed by a human |
| 60 s route-ahead monitor while driving | 0 unknown factors counted as safe |

HUMAN GOVERNANCE

REAL SCREENS • APK 1.0.18

Driver • 23 languages

Manager • mobile

APK 1.0.18. One login, server-decided role. Every language shows its status — Verified, Draft or English fallback.

RESEARCH / EVIDENCE SOURCES BEHIND THE ROUTE DECISION

ROUTING / PLACES

OSRM • OpenStreetMap • Nominatim

Road geometry, alternatives, turn steps.

WEATHER / TERRAIN

Open-Meteo • MET Norway • Copernicus DEM • OpenTopoData

Forecast along the road; climb, gradient, steep segments.

OFFICIAL / FLOOD

NDMA SACHET (CAP) • Copernicus GloFAS

Official warnings with freshness; discharge vs 30-day mean.

LANDSLIDE HISTORY

NASA Global Landslide Catalog

Historical exposure, 2007–2017, ≤5 km accuracy.

AI ASSISTANCE

Google Gemini

Explains in the driver's language. Never safety authority.

PROBLEM STATEMENT

MDoNER • SIH26002

Smart logistics and accessibility intelligence for the NER.

EXPERIMENTAL LANDSLIDE RESEARCH

95 %

RECALL

NER geographic holdout • 154 events • no NER row in training

SAFETY GATE

NOT DEPLOYED

FPR 50 % too high for production deployment

VALIDATION BEFORE AUTOMATION. Recall was not enough. Held-out testing exposed the false-positive rate. The gate keeps it out of routing.

Precision 0.32 • F1 0.48 • PR-AUC 0.55 • ROC-AUC 0.83 • Brier 0.12 — calibrated logistic regression, NASA GLC + ERA5-Land rain + DEM slope
